INSTRUCTIONS FOR USE

SMEEZU

INSTRUCTIONS FOR USE

SMARTWATCH

N.B.: Please read these instructions carefully before using the device and keep them for future reference!

1. CONTENTS
Your package contains:
- 1 Smeezu Smartwatch
- 1 USB cable to connect the device to a computer and recharge the battery
- Stereo earphones
- 1 instruction manual

2. TECHNICAL SPECIFICATIONS
4GB internal memory, 3.7V Li-ion battery, 400mAh. Wireless technology version 2.1. Screen: 1.5 inch capacitive touch panel.

3. IMPORTANT SAFETY PRECAUTIONS
Follow these instructions to preserve the operational lifespan of your Smartwatch:

- It is strongly recommended that you allow the battery to charge fully before using the device for the first time.
- Do not recharge unattended for longer than 3 hours.
- Do not hang the device by its earphones or cable.
- Never force any cable connectors into the ports of your Digital Media Player or computer. Always make sure that your cable connectors are identical in shape and size before attempting to connect.
- When disconnecting your Smartwatch from a computer, use the Safely Remove Device function on your computer. Never disconnect your Smartwatch while transmitting data.
- Safe use for listening to music depends on exposure time and volume levels.
- Do not immerse in water.
- Do not disassemble or incinerate the battery and do not expose it to temperature above 40°C.
- Never use liquid or aerosol cleaners. Use a damp cloth for cleaning. Never use water to clean the screen.
- Do not use this Smartwatch in extreme temperatures. Do not use in hot, cold, dry, or damp areas. Keep away from water, fire, and radiation.
- Do not disassemble your Smartwatch
- Do not allow young children to use your Smartwatch unsupervised.
- Do not install other software onto your Smartwatch.
- Never use an electrical device when the plug or power cord is damaged, or if it has suffered from a malfunction, or has been damaged in any way.
- If the power cord is damaged, it must be replaced by the manufacturer, certified after sales service or by a similar qualified person to avoid danger. Do not disassemble, attempt to repair or modify the product yourself.
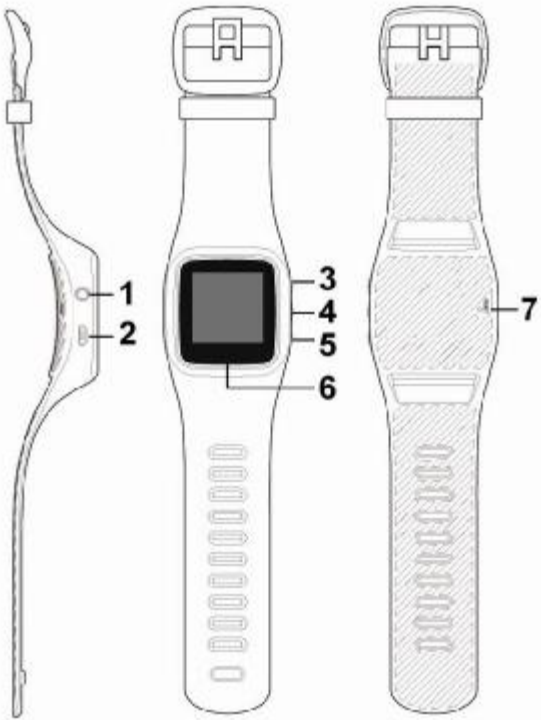

PREVENTING HEARING LOSS

CAUTION: Sustained use of personal stereo earphones at full power can damage the user's ears.

NOTE: The headphones or earphones for this device comply with European Union sound pressure levels stipulated in the EN 50332-1:2000 standard.
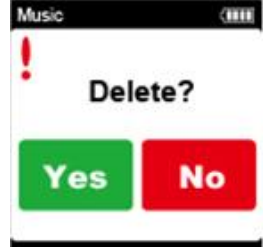

4. PRODUCT DESCRIPTION

5.7 Transferring music from the Smeezu watch to a BT device

After the Smeezu watch has paired successfully with the BT device (speaker or headphones), you will be able to listen to music stored in the Smeezu watch internal memory via the BT speaker or headphones. Use the same buttons as explained in point 5.2 Music mode to control the music (play, stop, skip, etc.).

6. Sport

This device measures time, steps, calculates distance, time and calories.

6.1 Set user profile

Before first using the Sport function, go to Settings - > Sport – User Profile" to set your user profile

6.1.1 Set user's length of step when walking (Walk Step Size)

Press the number you would like to modify so it is displayed in red, then swipe down to modify. For information, the average length is 80cm.

6.1.2 Set user's length of step when running (Run Step Size)

Press on the number you would like to modify so it is displayed in red, then swipe down to modify.For information, the average length is 100cm.

Note: Please enter correct data for step sizes before starting to walk/run. As each step size is slightly different, the result for the total distance will also be slightly different.

6.2 Walking & Running

6.2.1 Quick GO: for a quick start

Swipe right to left to show the different displays in Quick Go mode.

Note: The Sport function will not stop if you return to the main menu
If you swipe left to right to go back to a higher menu level, the Sport function will continue automatically.

6.2.2 Compete against yourself

The goal to reach will be your best recorded time. You can choose from the highest calorie count, the maximum length of time or the longest distance (Best calories / Best time / Best distance)
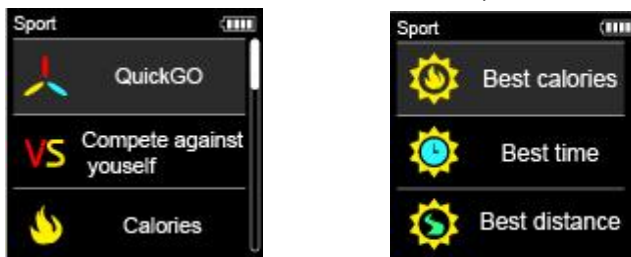

6.2.3 Calories/Time/Distance

You can set a target by choosing Calories, Time or Distance. You will be notified automatically when the target is reached.

Calories

Press on Calories. Then press on the number you would like to modify so it is displayed in red, then swipe down to modify.

Time

Press on Time. Then press on the number you would like to modify so it is displayed in red, then swipe down to modify.

Distance
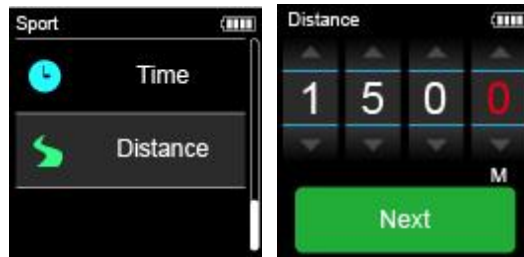

Press on Distance. Then press on the number you would like to modify so it is displayed in red, then swipe down to modify.

6.2.4 History

History can store 20 records. Long press a record to delete it.

6.2.5 Music

You can choose if you want to listen to music when walking or running (this function is not available in Quick GO mode)

6.2.6 Checking results

To check the data once the exercise is finished, press Stop, confirm Yes and swipe left to right to display the different screens in the following order.

Calories burned are represented by the following foods:
chocolate, ice cream, soft drinks

30g Chocolate

60g Ice cream

80 ml Softdrink

To check if the Target has been reached:

Target — 1.50 km

100%

Target — 00:40:00

80%

7. Stopwatch

Enter Stopwatch and select Start to begin the count

Stopwatch

00:00₀₀

Start   Reset

Press on Lap to record the number of laps and the time for each lap.
Every tap on Lap adds one lap to the total lap number.
Press on Stop to pause the stopwatch and tap Start again to resume it.
Press Reset to clear the count.

Sportwatch
00:32$_{40}$
Stop   Lap

LAP1   01:28.20
Sportwatch
01:28$_{20}$
Stop   Lap

LAP3   05:12.20
Sportwatch
05:12$_{20}$
Start   Reset

If laps are recorded, tap in the top right corner to display the list of all the recorded laps.

8. Settings

Enter the Settings menu

Sport: To set user profile

Device: To set Repeat Mode, Play Mode, Display, Date and time, Language.

9. Connecting to a computer

Connect the device to a PC via the USB cable to use it as a Removable Disk.

When the device is connected to the PC, press the button to exit from Connect User Interface and return to the main menu.

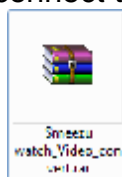

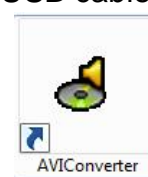

10. Recharging the device

Use the cable supplied to connect the Smartwatch to a USB power source and recharge the battery.

11. Video Conversion Tool

This device supports AVI (128X128) video format files. The Video Conversion Tool supplied with the Digital Media Player can convert most video files into AVI (128X128) video format. The Video Conversion Tool can be found in a folder inside the Smartwatch, just connect the watch to the PC using the USB cable to access this.
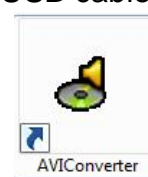

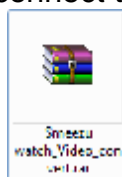

1. Unzip the file to display the following icon:
2. Open the conversion tool

2. Click on Add and select the video source, choose the target file path, name the file, then click on Save

3. Click on Convert Now. When the conversion is finished, search for the file using the target file path in your computer.
Then save the file in the Smeezu watch to play it.
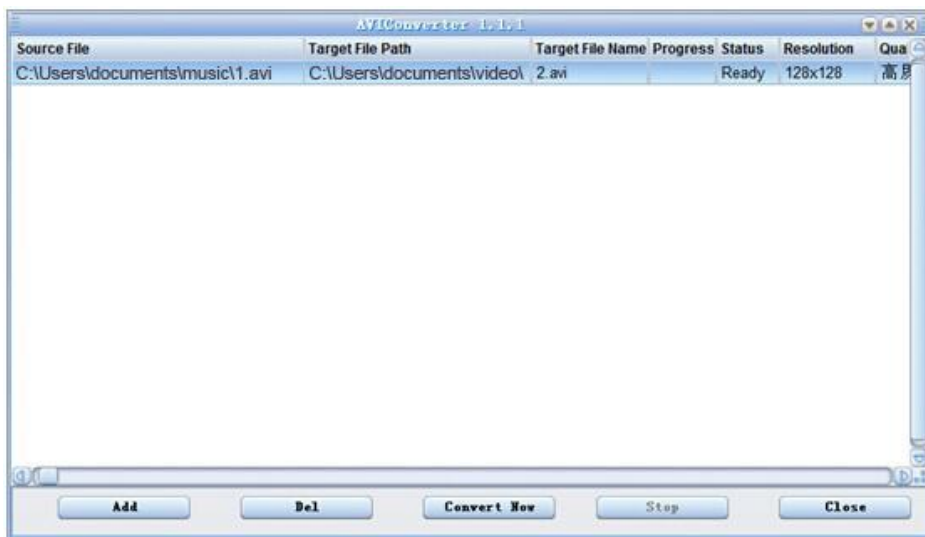

12. Trouble shooting

Symptoms	Trouble Shooting
